1. Let's test your knowledge of networking services! You're an IT Support Specialist at a new company. As your company grows, your manager asks you to solve various networking problems. Your task is to select the correct network device or server to solve the manager's request.

1 / 1 point

Step 1: Read the manager's request in the top-left corner of the screen. The manager's request will be in the blue speech bubble next to the graphic of a person.

Step 2: Drag and drop the correct network device or server icon (e.g. DHCP) into the "drop here" box on the screen. If you make a mistake, click the back arrow button and try again.

Step 3: After you have completed all requests, close the quiz window and click the "Submit Quiz" button.

Good luck!

IMPORTANT: At the end of the interactive you will need to select the next arrow button one more time before clicking SUBMIT to **receive a grade**.

Networking Services

Keyboard Usage

Let's test your knowledge of networking services! You're an IT Support Specialist at a new company. As your company grows, your manager asks you to solve various networking problems. Drag the correct network device or server onto the network to solve each of her requests. Good luck!

We need to be connected to the Internet!

Possible Services

 NAT	 ROUTER
 FIREWALL	 SWITCH
 DHCP	 VPN
