1.	Which of the following statements is true of XMPP? Select all that apply.	1/1 point
	XMPP is used in Internet of Things applications.	
	⊙ Correct	
	MMPP is a paid-for application for instant communication.	
	✓ XMPP is used in social networking services.	
	⊙ Correct	
	XMPP is an open source protocol used in instant messaging applications.	
	⊙ Correct	
2.	What type of DNS record is used for email servers?	1/1 point
	○ AAAA	
	MX	
	O CNAME	
	O A	
	○ Correct	
3.	Which of the following statements is true about cloud software services? Select all that apply.	1/1 point
	Software used as a business is usually different from software used as a consumer.	
	⊙ Correct	
	When setting up cloud services for your company, you might need to purchase added features for businesses and enterprises.	
	⊙ Correct	
	☐ There are no stipulations (licensing agreements) on how cloud services software is used.	
	☐ There are never limits on who can use cloud services software.	
4	Which of the following equality protected is used to format and transfer web content	4 (4
4.	Which of the following security protocols is used to format and transfer web content.	1 / 1 point
4.	○ The SMB protocol (Samba)	1 / 1 point
4.		1/1 point
4.	The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS)	1/1 point
4.	 ○ The SMB protocol (Samba) ⑥ Hypertext Transfer Protocol Secure (HTTPS) ○ The Secure Socket Layer protocol (SSL) 	1/1 point
4.	The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS)	1/1point
	The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS)	1/1 point
	 ○ The SMB protocol (Samba) ⑥ Hypertext Transfer Protocol Secure (HTTPS) ○ The Secure Socket Layer protocol (SSL) ○ The Transport Layer Security protocol (TLS) ⓒ Correct 	
	 The SMB protocol (Samba) ● Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) ② Correct Which of the following activities can users do on a properly configured file storage server?	
	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files 	
	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files ○ Correct 	
	 The SMB protocol (Samba) ● Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) ② Correct Which of the following activities can users do on a properly configured file storage server? Share files ② Correct Grant a digital certificate of trust 	
	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files 	
	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct 	
	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct Access a shared directory 	
5.	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct Access a shared directory 	
5.	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct Access a shared directory Correct Access a shared directory Samba services Samba services 	1/1 point
5.	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct Access a shared directory Correct Access a shared directory Samba services An NFS server 	1/1 point
5.	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct Access a shared directory Correct Access a shared directory Samba services Samba services 	1/1 point
5.	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files ○ Correct Access a shared directory ○ Correct Access a shared wire the sole IT employee at your company. Most of the computers in your fleet are Windows machines. Your boss wants you to set up a network file storage. What file service should you use? Samba services An NFS server An HTTP server 	1/1 point
5.	 The SMB protocol (Samba) Hypertext Transfer Protocol Secure (HTTPS) The Secure Socket Layer protocol (SSL) The Transport Layer Security protocol (TLS) Correct Which of the following activities can users do on a properly configured file storage server? Share files Correct Grant a digital certificate of trust Modify shared files Correct Access a shared directory Correct Access a shared directory Samba services An NFS server An HTTP server A Database server 	1/1 point

 Company B is setting up commercial printing services on their network. Which of these are advantages of centrally managed commercial printers? Select all that apply.

It provides a central interface to collect diagnostic reports, such as low toner levels

 ${\bf 1}\,/\,{\bf 1}\,{\rm point}$

	⊙ Correct	
	Physically distant printers can be more easily managed	
	⊙ Correct	
	It allows the ability to deploy printer driver software so that your users can print from their computers	
	⊙ Correct	
	Printers can be managed one at a time	
8.	An employee sets up Apache HTTP Server. They type 127.0.0.1 in the browser to check that the content is there. What is the next step in the setup process?	1 / 1 point
	Set up DNS so the server can be accessed through the Internet	
	Assign a static IP address	
	O Nothing, the web server setup is complete.	
	O Install CUPS	
	⊙ Correct	
9.	Which of these are examples of database software? Select all that apply. MySQL	1/1 point
	⊙ Correct	
	Apache	
	☑ PostgreSQL	
	⊙ Correct	
	CUPS	
10.	When a website is having issues on the server side, what number does the HTTP status code start with?	1/1 point
	● 5xx	
	○ 2xx	
	○ 4xx	
	○ 6xx	
	⊘ Correct
